in and concern about potential performance impacts associated
with adding data labeling to our computer systems. Additional

6. C/OSDO is continuing to pursue HSD's needs and requirements regarding radio communications between the Old and New Headquarters Buildings. A representative from the New Building Project Office advised that the New Building Communications Program Division (NB/CPD) had "reinitiated" action on the project and that January 1988 has been established as a target date for a "working system." Reports from NB/CPD indicated it now seems on track. NB/CPD also reports that the NOB opening date has slipped to June/July 1988. HSD and Security Equipment Support Division personnel are continuing to participate in the project as well.
